Rules for every order

Before each order: if the WInS price is above 'Recompute if above', shares = $2,177 ÷ price (30% stocks) or $2,613 ÷ price (25% stocks); $1,306 ÷ price for each Incyte or Exelixis half.

Skip any stock trading below its 200-day average (Meta is only ~2% above). **CF:** if WInS volatility is 0.10 or less, buy 21 with a 25% stop. **BayCurrent:** if 30 shares is rejected (100-share lots), buy Wolters Kluwer (WKL · Amsterdam) for ~$2,177.

After each fill: new order · Sell (not Sell Short) · Stop · all shares · fill × 0.70 (30%) or × 0.75 (25%) · GTC. After a second half, replace the stop: all shares, 25% below average cost.

Cash: ~$33,800 after Micron; the 16 orders use ~$31,598 + $400 commissions, leaving ~$1,802. Sizes: 1.25% of the growth bucket (~$52,255) at risk per stock. Portfolio freezes Fri 6 Nov.
